

1398D

Distribution Amplifier

4K HDMI® Signal Distribution

Model 1398D from Audio Authority® is the ideal solution for merchandising 4K displays and projectors. It distributes Ultra High Definition audio and video signals from one source to eight UHD display devices. At 18 gigabits per second, it is capable of transmitting native content at the highest resolutions so that retailers can exhibit the maximum capabilities of UHD displays.

The 1398D allows the installer to choose an EDID mode, in case there is a problem getting the source to send the desired audio and video format. Multiple 1398Ds may be cascaded to create large distribution systems.

- 4K/60 (2160p)
- 4:4:4 color
- 600 MHz
- 18Gbps

HDMI FEATURES:

- 4K resolutions up to 4096x2160p and 3840x2160p
- HDCP 2.2 and 1.4 compliant
- Bandwidth: 18Gbps, 600 MHz pixel clock
- High Dynamic Range (HDR) 4K@50/60
- Supports bitstream audio including all Dolby® and DTS formats
- 7.1 channel lossless audio (LPCM)
- Standard/TV EDID presets, or settings may be learned from TVs
