HD Signal Distribution Amp for Custom Integration

LEXINGTON, KY., August 28, 2007 - Audio Authority announced a versatile new HDTV signal distribution amplifier designed just for custom integrators. Its side facing jack panels make it easy to mount in tight spots and its high bandwidth audio channels allow them to be used for video in various ways (see chart below).

Model 1185ci Signal Configurations

Component Video	Y	Pb	Pr	Left	Right	Optical	Coax
RGBHV	R	G	B	H	V	Optical	Coax
Component & Composite	Y	Pb	Pr	Left	Right	--	Composite

Jacks used for video

- One input, four outputs
- YPbPr component video up to 1080p
- Digital audio (coax and optical)
- Analog audio
- Alternate use: RGBHV + Digital Audio
- Digital audio pathway may be used for composite video

Manufacturer suggested retail price: \$250.00; call for dealer information. Available November, 2007.
