New Customer Video Stations

Improved Video Customer Station Cabinet

Our newly redesigned Model 1522, 1523, 1524, and 1525 have the same features and quality audio and video components inside as previous versions; however, there have been several improvements to the enclosure design and materials.

- More streamlined appearance
- More durable finish
- Reductions in depth and height allow units to blend better into installations
- The speaker is now incorporated into the body of the cabinet, allowing better mounting flexibility
- All units* can be mounted from left or right side, the bottom or the back

* The only mounting exception is the 1525 which has a handset mounted to the right side, preventing right side mounting.
