

News: For Immediate Release

Two New Cat 5 Receiver Options for the AVATRIX™

LEXINGTON, KY., Sept. 4, 2007 - In response to customer's requests for additional installation options, Audio Authority is introducing two new Cat 5 receivers for the company's HD over Cat 5 distribution systems.

The Decora® style 9879 Wallplate comes in three colors and fits a single gang j-box. Its dual IR jacks (front and rear) provide connections for external IR receivers or in-wall IR wire paths. The Model 9880 is perfect for wall-mounted displays. Cable connections are parallel to the wall, allowing near-flush mounting for flat panel displays.

The 9879 and 9880 join the stainless steel, dual gang Model 9878 Wallplate in the AVATRIX family. The new receivers will be available in the 4th quarter of 2007 at \$199.00 MSRP. Dealer pricing available upon request.

9879 Features

- Single gang size
- Comes with inserts in Decora® colors white, bone and almond
- Component Video, Analog Audio, and Digital Audio output jacks
- Front panel 3.5 mm jack provides connection point for external IR receiver
- Internal infrared jack provides connection point for in-wall IR wiring

9880 Features

- Steel enclosure does not require j-box and can be mounted on any flat surface or inside a wall
- Component video, analog audio, and digital audio output jacks
- Infrared jack provides connection point for IR receiver

Feature Comparison Chart
