Audio Authority's Six-Output HD-over-Cat 5 Solution

LEXINGTON, KY., June 21, 2007 - The SixDrive™, is a 1x6 distribution system that delivers audio and HD video signals over Cat 5 cable. The SixDrive joins the AVAtrix™, a 6x6 matrix, and the DuoDrive™, a 1x2 distribution system, in Audio Authority's line of HD-over-Cat 5 signal distribution solutions. All of the systems are expandable, and employ the same remote Wallplate, Model 9878. Differential balanced line technology and cable length compensation circuits allow the remote Wallplates to be located up to 1,000 feet from the source without degradation in signal quality.

SixDrive Features

- One audio/video input, six Cat 5 outputs for Model 9878 Wallplates
- Expandable up to a total of 42 remote locations, each up to 1,000 feet away.
- Full audio support including digital audio (optical and coaxial input) and analog stereo audio
- Wallplates powered through Cat 5 cables - Wallplates do not require separate connection for AC power
- Provides pathway over Cat 5 for IR commands sent from Wallplates back to source equipment
