

Model 9A10 Head Unit Connection Module

The 9A10 Head Unit Connection Module provides a convenient way to connect each head unit in a display to the switch module. This diagram shows one head unit connected to its 9A10. Mount the 9A10 Module near the mounting location of the head unit that will be demonstrated. Connect the RCA cables and DC power from the Model 910 Head Unit module to the 9A10. As the head unit is being installed, connect the RCA and high-level signal cables to the 9A10, and finally, connect the DC power to the head unit.
