

1580 Series 1-on-2 Intercom Systems

Simple, complete solutions for banking and pharmacy drive-up communication.

The **1580 Series** is a complete solution for one teller or pharmacist to communicate with one or two drive-up lanes. Designed to minimize cost for simple 1-on-1 or 1-on-2 drive-up applications, it incorporates the great features and sound quality of our versatile 1500 Series in a less expensive design. The 1580 Counter Stations connect directly to a special 1583 Dual Lane Station via Cat 5e/6 for easy installation. Counter Stations are available with a handset for privacy – see Kit 1580HS below.

FEATURES:

- Excellent two-way audio performance
- Intuitive lane selection with volume up/down controls
- Lane camera up/down controls for video applications
- Durable, easy to clean, touch-sensitive keypad – no moving parts
- Privacy feature bypasses mic & speaker when headset or handset is in use

Model 1580H counter station shown with optional 1582 two-way video add-on. Base dimensions are 7 x 7.25 inches, not including handset and video add-on.

- 1580H Counter Station with Handset
- 1583 Dual Lane Station
- Power supply (powers Counter Station and Lane Station)

1580 SERIES SYSTEM COMPONENTS

1580 systems are simple and easy to install, and easy to accessorize with wireless headset, handset, or two-way video. The 1580 Series is functionally the same as our 1500 Series Intercoms, so no additional operator training is required. However, its wiring is unique, so it cannot be mixed with 1500 Series Counter Stations, Lane Stations, or Hubs.

Model 1580
Audio Counter Station

Two lane audio intercom Counter Station with microphone and speaker. Features volume control, camera tilt controls, hold button, privacy button, and headset jack for wireless headset.

Model 1580H
Audio Counter Station with Handset

Two lane audio intercom Counter Station with microphone and speaker, plus a built-in handset for private communication. Features volume control, camera tilt controls, hold button, privacy button, and headset jack for wireless headset.

Model 1582
Two-way Video Add-on

Enclosure for LCD screen and camera that enables two-way video for a 1580 Counter Station. High brightness display, wide angle camera, adjustable height and tilt.

Model 1583
Dual Lane Station (Audio)

Lane Station for audio communications with one or two drive up lanes. Connections for microphone, speaker, call button, and other controls. Also features inputs for program audio, and connections for lane handsets.

Model 1584
Video Matrix

Video Matrix is required for video intercom capability, and includes connections for additional security camera and DVR output
