

Push Buttons

Illuminated Controls for Interactive Demonstrations

Product Select Button with Modular Plug

Ascentic™ EasyPlug push-buttons provide an attractive, simple interface for demonstration systems. The LED light ring invites customers to select products and adjust volume or select music tracks. This stainless steel, momentary switch connects via a standard RJ9 modular plug, making installation a snap. RJ9 harnesses are compatible with Ascentic products including MediaHubs, 1700, and 1800 series equipped with RJ9 button ports, and available in several lengths upon request.

Features:

- Modular plug design for easy installation
- Attractive stainless steel construction
- Bright LED illumination
- Blue, white, or red LED
- Custom colors available in select quantities

Specifications

- Hole size: 0.75 inch (19 mm)
- Outer diameter: 0.9 inch (22.5 mm)
- Maximum panel thickness: 0.5 inch (12.5 mm)
- Required depth: 1.75 inches behind front panel surface
- LED Colors: blue (013-100), red (013-101), white (013-102), and other colors on request
- RJ9 cable is available in several lengths – sold separately

The modular RJ9 plug makes this button easy to install, and reliable for the life of the demonstration system. RJ9 is the same four-conductor format used for most telephone cords, making the harness easy to obtain in any length. The standard 802-807 harness is 1.5m long, with other lengths available upon request.
