- Camera up/down tilt mechanism via counter station controls
- Powder-coated steel enclosure is durable, attractive, and economical
- Compact, weather-resistant design keeps out water and dirt
- Heater keeps moisture out, and prevents fogging
- Privacy handset or adjustable mounting arm, optional

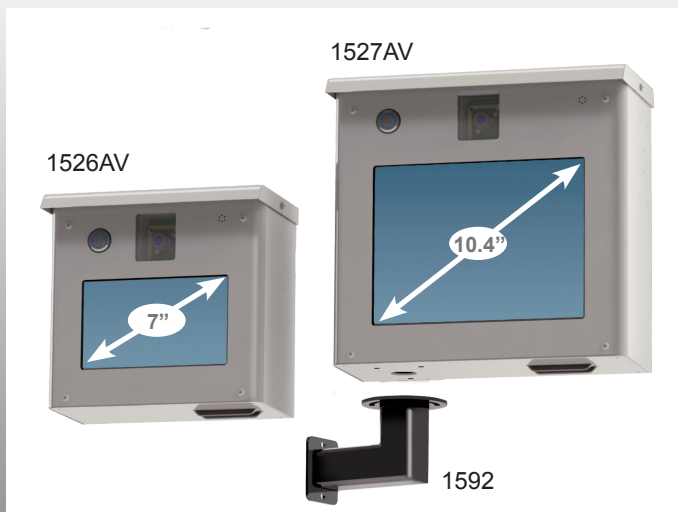

1527V with optional privacy handset

The **1526 / 1527 Series** is an approach to two-way video communications that offers durable performance and economical packages. These units come in two functional packages: a basic camera and video display package for connection to a 1520 Lane Station, or an Integrated AV Customer Station that includes a call button, microphone, speaker, and all the functionality of a 1520 Lane Station. 7 inch and 10.4 inch screen sizes available. The special Pixim camera utilizes the exclusive Digital Pixel System that can render sharp details in images even with strong backlight and/or deep shadow conditions. The LED back-lit screen uses less power, and delivers bright, clear video images.

Two-way Video Display with Camera (requires 1520)
Model 1527V offers two-way video including a camera and 10.4 inch display. 1526V has 7 inch screen (not shown).

Integrated Audio-Video Customer Stations

These full featured customer stations include a call-button, microphone, and speaker, as well as the LCD display and camera. Available in 7 inch or 10.4 inch screen size, the LCD is LED back-lit for low power draw and long life. Customer stations connect to the intercom system directly (includes all 1520 functionality).
