

OEM Solutions for Series 1500 Lane Video

Drop-in video and audio solutions for drive-up and walk-up customer service.

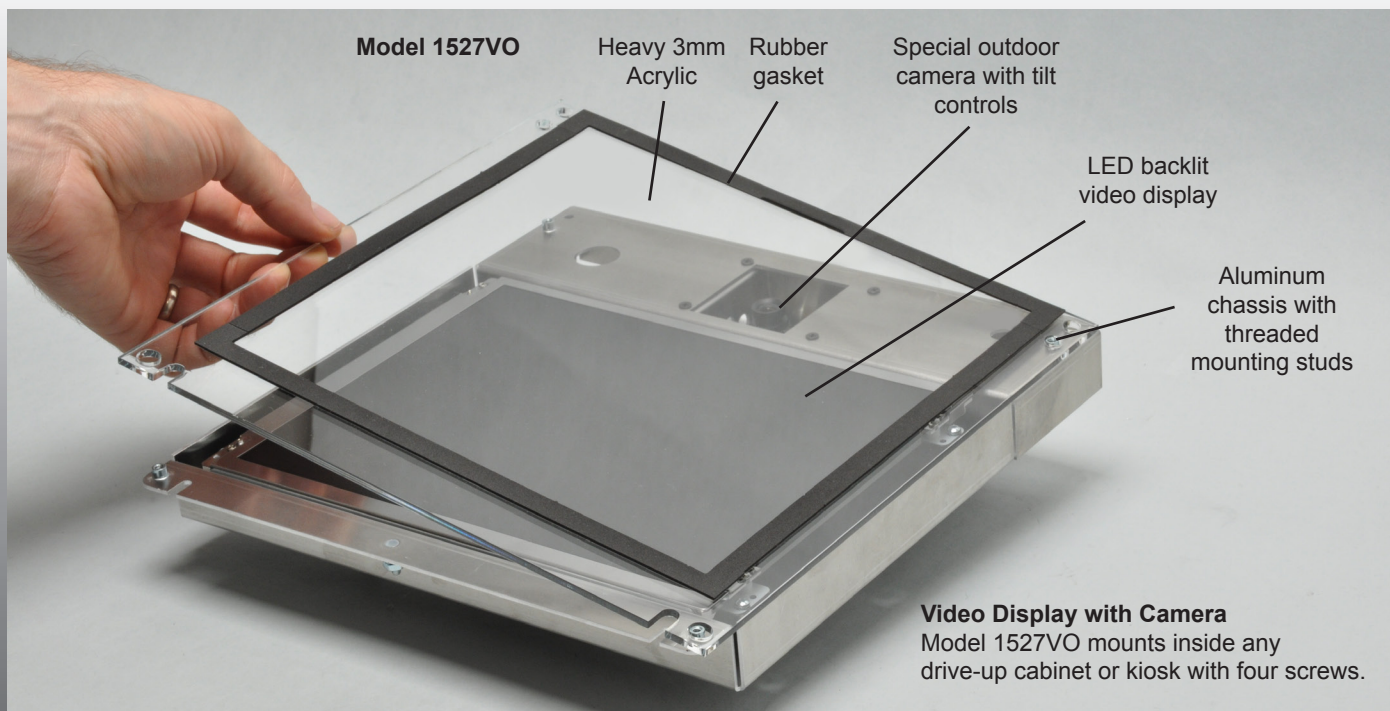

FEATURES:

- Outdoor camera for high performance in challenging lighting conditions
- Camera up/down tilt mechanism via counter station controls
- Bright, vivid LCD display with LED backlight for minimal power usage
- Weather-resistant acrylic with gasket keeps out water and dirt
- All components securely mounted to a compact chassis
- Installs with four screws and one Cat 5 connection
- Built-in* heater with thermostat keeps moisture out, and prevents fogging

The **1526 / 1527 Series** is an approach to two-way video communications that offers durable performance and economical packages. These units include a camera and video display that connect to a 1520 Lane Station with one Cat 5 cable. Available in 7 inch and 10.4 inch screen sizes. The special outdoor camera utilizes technology that can render sharp details in images even with strong backlight and/or deep shadow conditions. The LED back-lit screen delivers bright, clear video images with minimal power usage.

Model 1527VO 10.4 inch video chassis for OEM Drive-ups. Other models available with integrated call button, speaker, and microphone.

* Heater requires the 571-020 power supply.
