Demonstration Video Player

Bring Interactive HD Media to Retail Store Displays, Digital Signs, and Trade Shows

Features:

- HDMI® high definition output (1080p)
- Digital and analog audio output (2-channel)
- Video formats include MP4, MOV, MKV, TS
- Audio formats include MP3, FLAC, MPEG2, WAV, LPCM, AAC, AC3, RA-lossless, and SRS
- Player control via RS-232 serial commands, push-buttons, and IR commands
- Auto play at power-up (files in root directory)
- Playlists - push a button to start a playlist of images, audio and/or video clips
- Slideshow mode with music

This versatile media player from Audio Authority® provides an easy way to add video content to an interactive display. It has a variety of interface methods including push-buttons, serial communication, and IR. Load video and/or audio files on an SD card. Video and audio output can be digital and/or analog.

DEMO BUTTON OPTIONS

- ILLUMINATED PUSH-BUTTON
- PLASTIC OR STAINLESS STEEL
- OTHER COLORS AVAILABLE

Example System:

Gaming Headphone Demo Display

A video loop plays as shoppers approach the display. Select a pair of headphones, press the button, and a custom track for the SKU you chose plays a video and audio clip to promote that pair of headphones. A timeout counter returns the display to the attract loop after each demo.

Action Behind the Scenes

Combined with our 1726 headphone demo amplifier, the media player gives serious gamers a high impact visual demo along with the audio.
