Audio Authority®

1809
USB to RS-485 Adapter

# Interface USB Devices with RS-485

The Model 1809 allows USB devices such as PCs, tablets, and media players to interface with Audio Authority® demonstration systems. The example below shows how to use TouchSelect panels to send commands to a compatible media player.

Features:

- Converts RS-485 to USB
- Control devices via RS-485 network
- Power via USB or AC power adapter

Example System:

A button press on a TS04 touch panel on the display triggers these simultaneous actions: a specific video track begins to play on the TV, audio plays through the speakers, and the product on display is lit by an LED strip.
