

1830

Bluetooth® Headphone Demonstrator

Demonstrate Bluetooth® Headphones

Audition up to three pairs of Bluetooth headphones with the 1830 Demonstrator. The 1830 pairs with headphones, playing music from a default audio source, like an Audio Authority® MediaHub, or from a customer's device.

- Capacity: three headphones
- Easy setup and pairing of Bluetooth headphones
- Timeout returns the display to silent standby mode
- USB ports for after-hours recharging
- Communicates with a media player to trigger custom tracks

Example System:

The customer activates a pair of headphones by pressing a button. A custom video begins to play that promotes the selected headphone model. The customer can adjust the volume using the up and down volume buttons. If they choose to listen to their own music, customers can connect a phone or other device via Bluetooth or the auxillary input, which overrides the sound track.
