

A-V Receiver Switching Module

Switches up to four receivers (five channels of high level output, plus subwoofer), in an **AccessEz™** demonstration system.

The Audio Authority® Model 945 is designed to switch up to four A-V receivers including analog audio, digital audio, sub out, and up to five channels of high-level speaker outputs. The 945 can be used by itself, or as a part of a full featured AccessEZ audio and video demonstration system like the example shown below.

Example System:

Features:

- Switch input signals to four A-V receivers, including analog audio, and digital audio
- Switch five speaker output channels: fronts, center, surrounds, plus sub out
- High-level terminals are removable for fast installation
- Dimensions (H-W-D): 5 x 13 x 1
- Proudly made in our U.S. factory
