

970A-1 Controller Module

Custom Demo Control

Customize interactive devices to control ACCESS Ez™ demonstration systems.

Let customers experience merchandise your way with automated demonstrations for products like soundbars, car audio, headphones, or portable speakers using the 970A-1 Custom Control Interface. The Audio Authority® 970A-1 allows any device that is capable of sending RS-232 commands to control the Access Demonstration Network.

Features:

- Any RS-232 device can send commands to the Access switching system
- Adjustable baud rate: 9,600 or 19,200
- Add audio switch modules
- Two way communication with Access systems

Example System:

Home theater sound demo with mix-and-match speaker switching via custom touchscreen control interface.
