

# Tablet Control

## Multi-touch Demo Interface

## Touchscreen Control for Demonstrations

Today's shoppers expect to see colorful images that they can swipe and touch for an engaging digital experience in the store. Beyond the graphics, information, and videos that a tablet can offer, Audio Authority offers external devices that coordinate sound, light, and touch with the screen experience. Activity on the tablet can be coordinated with lit shelves or other lighting effects, and as you would expect, Audio Authority offers the highest quality audio switching and amplification for speaker demonstrations and other sound-oriented products.

### Features:

- Product selection via touchscreen
- Enclosed or open frame designs available
- Screen sizes from 7 up to 21.5 inches
- Controls external automation modules via serial commands
- Audio output with volume control
