1720S Feature Switches and Connections

**POWER**

**12V INPUT**

**FEATURES**

**TIMEOUT**

**SELECTOR BUTTONS**

**TV SOUND**

**SOUNDBAR**
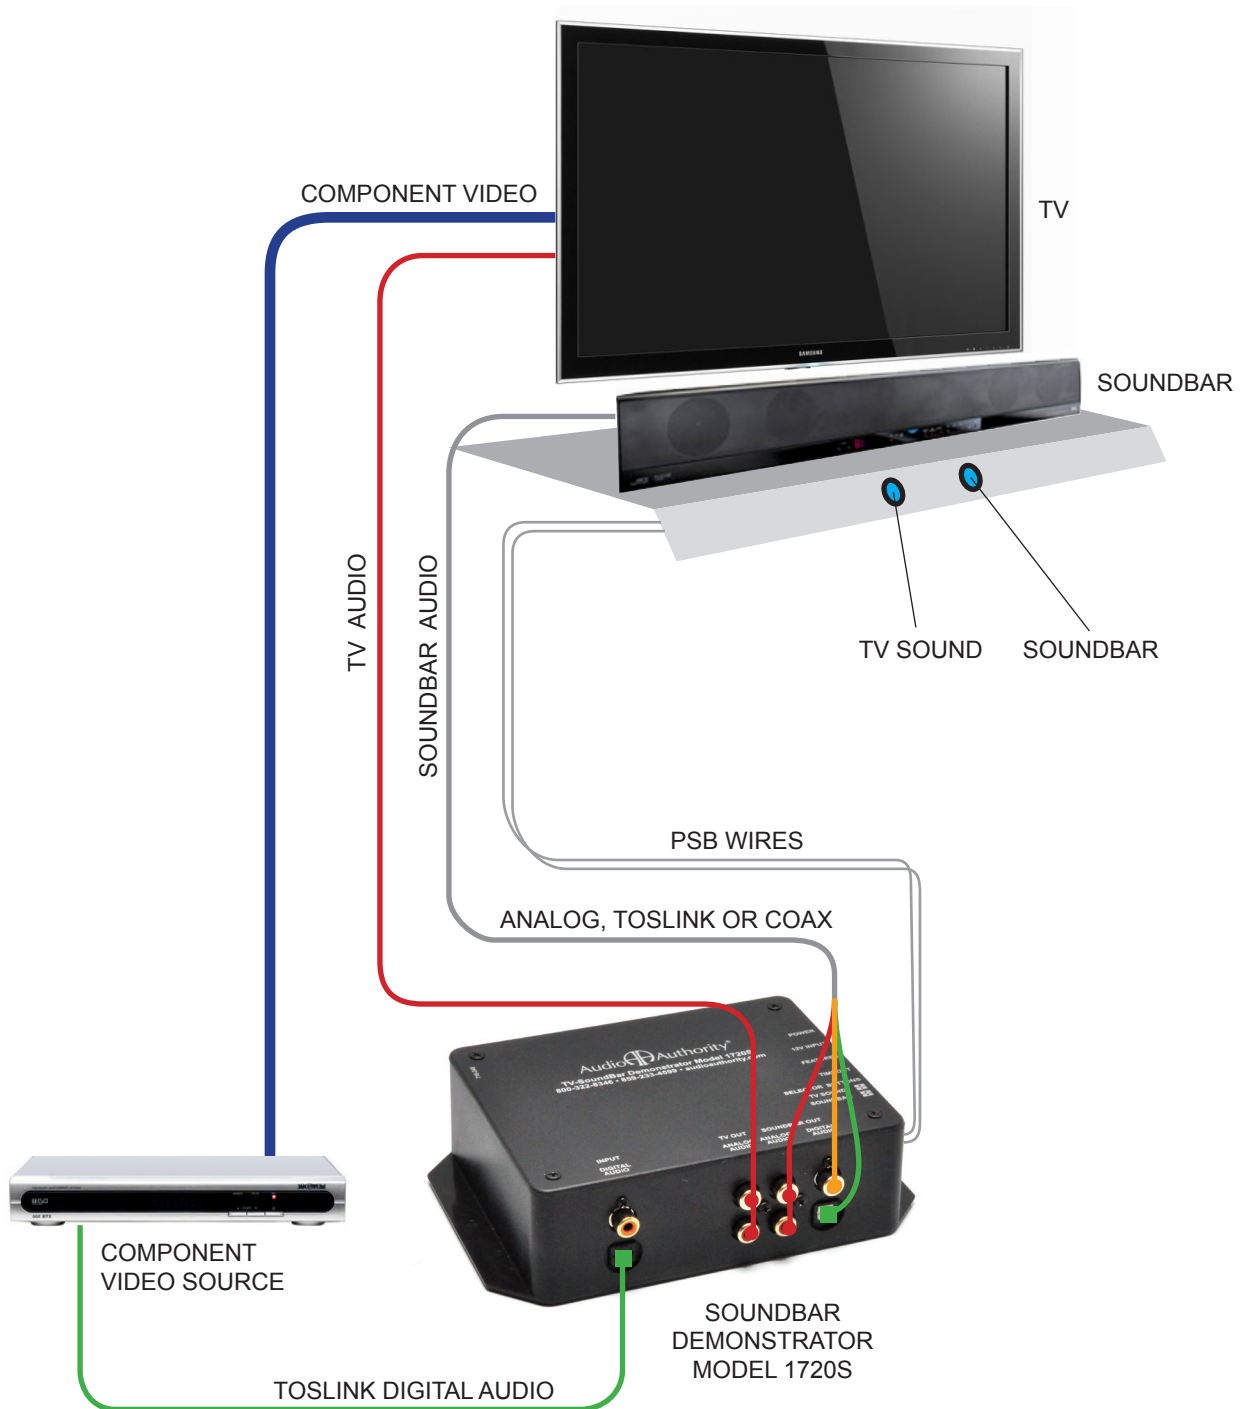

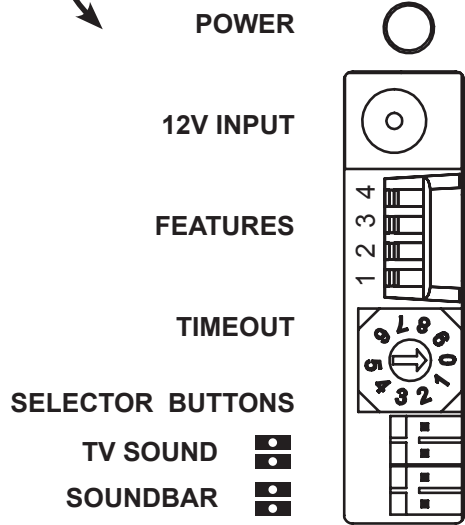

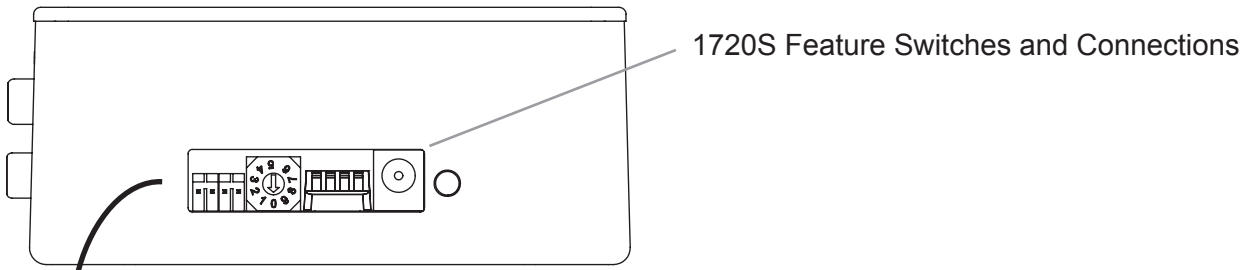

**POWER INDICATOR**
LED is on when unit is powered.

**12V INPUT**
Power input for 12V AC adapter.

**FEATURES**

**Switch 1: BUTTON MODE**
If switch 1 is on, the demo operates in one-button mode, a toggle between the sources. Connect the one button the "TV Sound PSB port. If this switch is off, the demo operates in two button mode, one button for each mode.

**Switch 2: AUTO DEMO**
If this switch is off, the system is in normal demo mode and listens for one or two buttons based on DIP switch 1 setting to toggle between sources. After the timeout value (see TIMEOUT below) with no activity, the demo ends.

If this switch is on, the system is in auto demo mode; when the button is pressed, it plays TV sound for one timeout period (see TIMEOUT below), then switches to soundbar for one timeout period and then ends.

**Switch 3**
Attract mode A (switch 3 OFF) the inactive product button flashes.
Attract mode B (switch 3 ON) active product button flashes.

**Switch 4**
Not used.

**TIMEOUT**
Set to zero to disable timeout. (The Timeout dial sets the length of demo. Each number represents an increment of 15 seconds times the number on the dial. A setting of 1 x 15 = 15 seconds. 2 x 15 is 30 seconds, etc.

**SELECTOR BUTTONS**
Use one or two illuminated switches to activate the demo. See Switch 1: Button Mode above for options.
